

West Side Heroin/Opioid Task Force Outreach

SCHEDULE

2/2/21 – 2/25/21

(All outreach starts at 11 AM, based on weather conditions)

The Task Force Outreach Team provides on-site training on how to respond to Overdoses and provides the overdose reversal drug naloxone, also called Narcan in its nasal-spray form. The team works in collaboration with organizations that provide treatment and support for those with Opioid Use Disorder. These organizations can assist individuals in receiving Medicine-Assisted Treatment, which relieves withdrawal symptoms and allows them to safely begin recovery.

For more information about the team or about how you or someone you care about can receive treatment for their Opioid Use Disorder, contact:

Contact – Luther Syas – Director of Outreach
